## OY410520

## Optical sensors • Light curtains

light curtain, $100 \times 20 \times 40 \mathrm{~mm}$, field height 75 , resolution $1 \mathrm{~mm}, \mathrm{Sn}: 0.1-0.4 \mathrm{~m}, 22-26 \mathrm{~V}$ DC, PNP/NPN Anticoincidence, Connector M12 4pin/4pin, IP65, Aluminum+PMMA

The multi-function light barriers are through-beam sensors where multiple beams are integrated. In case of interruption of only one beam, the switching output of the receiver changes its state. The devices are used where standard through-beam sensors with only one beam are not sufficient. There are devices with beam spacing of 20, 40, 60 or 120 mm and different heights available. An integrated fuzzy logic controls the transmitting power automatically.
